Profile

Front-end web developer seeking employment in the industry by creating and maintaining front-end web pages and applications and replicating designed content with coding languages. I have spent the entire past winter dedicated to studying and learning the foundational concepts and best practice methodologies of web development.

Experience

Sales Estimator at Metcon, LTD - Bradford, OH — 2015 - 2019

Compute volume of materials needed on commercial construction projects. Calculate hours of labor required for completion. Negotiate contractual obligations and terms with customer to obtain contract. Provide pricing for change orders and extra work. Provide support & troubleshooting of computers, computer software, file and asset hosting, internal and external networking, and mobile devices.

Truck Operator - Railsafe - Yakima, WA — 2013 - 2015

Operate heavy railroad pesticide spray equipment on-rail and off-rail to achieve vegetation control of railroad property. Stay updated with state licensing requirements and applicator laws by traveling to and submitting to individual state testing procedures to ensure competence. Maintain detailed and thorough documentation of areas/territories treated throughout the western U.S.

IT Helpdesk Support Associate - Lanicom - Troy, OH — 2011 - 2013

Work with clients to remotely and locally troubleshoot, diagnose, and repair computers, LAN and wireless networking issues, e-mail connectivity issues, maintain user administration and active directory user accounts.

Education

Treehouse Front-End Web Development TechDegree — 2018 - current

High School GED certification (Ohio)

Skills

Strong interpersonal and communication skills. Good knowledge of sales and negotiation. Understands the role of leadership and team collaboration to achieve a unified goal. Fast and eager learner. Hard skills: HTML5, CSS3, Sass, Less, JavaScript, jQuery, Git & Github, APIs and RESTful web services.
